SUMMARY

Software engineer and MCA graduate with Python internship experience and projects in backend APIs, full-stack web development, and computer vision. Built applications using FastAPI, Flask, React, and SQL, including a deployed luggage recognition system and a RAG document query app.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Web development: FastAPI, Flask, React.js, Next.js, HTML, CSS, Tailwind CSS

Data and tools: PostgreSQL, MySQL, Supabase, Elasticsearch, Docker, Git, Linux

Foundations: REST APIs, WebSockets, Google OAuth, data structures, object-oriented programming

EXPERIENCE

Python Developer Intern | Softkey Infotech, Jammu

Feb 2023 - Aug 2023

- Developed OpenCV pipelines for real-time object detection and image processing; integrated computer vision modules into internal applications.
- Built and integrated REST APIs using Python and Flask to support backend services and application workflows.
- Fixed a webcam resource leak causing crashes during extended sessions and resolved an OpenCV version incompatibility across deployment environments.

PROJECTS

Luggage Recognition System | MCA Thesis

2025

Python, YOLOv8, OpenCV, FastAPI, React, WebSockets | [GitHub](#)

- Built live-video luggage detection with YOLOv8 and OpenCV; exposed inference results through FastAPI REST and WebSocket endpoints to a React dashboard.
- Deployed the backend on Render and frontend on Vercel to make the application publicly accessible.

RAG Document Query App

2025

Python, FastAPI, React, LangChain, PostgreSQL, Elasticsearch, Docker | [GitHub](#)

- Built a retrieval-augmented generation application for querying PDF, PPT, and CSV files, connecting document ingestion, indexing, and retrieval with answer generation.
- Integrated LangChain, PostgreSQL, and Elasticsearch with a FastAPI backend and React interface; containerized the application with Docker.

Smart Bookmark App

2026

Next.js, Supabase, Tailwind CSS, Google OAuth | [GitHub](#)

- Implemented Google sign-in, session management, persistent bookmark storage, and real-time synchronization in a responsive Next.js and Supabase application.

EDUCATION

Baba Ghulam Shah Badshah University, Rajouri

Master of Computer Applications

Jun 2025

Bachelor of Arts

Aug 2021

CERTIFICATIONS

Python Programming, CITC India (2023)

MERN Full-Stack Web Development, 30 Days Coding (2026)
